

REBUILT INDUSTRIAL COMMUTATORS

We rebuild industrial commutators to stand up to the most punishing industrial conditions imaginable. All our steel and mica industrial commutators have an extremely versatile and durable construction that includes wedge shaped copper bars made from CDA116 industrial copper, combined with the highest quality mica available. This provides you with quality commutators that are "better than new."

- Our focus is on more popular motors used in rail systems, transit systems, and mining equipment. This includes traction motors, compressor motors and other demanding applications
- We are adding new products all the time in our offering of rebuilt commutators, give us a call to see if we are tooled to rebuild to your requirements.
